

Prospect Starter Kit

SETUP GUIDE

Connect your email to Claude in **6** simple steps

A free prospecting assistant — research any prospect,
draft a personalized email in your voice, and send it
from your own inbox.

~5 minutes · No credit card · Works inside Claude (web & desktop) · Disconnect any time

1 Create your free account

1. Go to prospect-starter-kit.nineten.ai and click **“Connect your email — free →”**.
2. Fill in your name, email, a password, and your phone number.
3. Click **“Create account →”** — you’ll be taken straight to the connect step.

The screenshot shows a web form titled "Create your account" under the heading "STEP 1 OF 2 · CREATE ACCOUNT". The form includes fields for "YOUR NAME", "EMAIL *" (with a placeholder "you@company.com"), "CREATE A PASSWORD *" (with a "Show" button), "PHONE NUMBER *" (with a country code dropdown and a placeholder "+60 12-345 6789"), and "COMPANY". A "Create account →" button is at the bottom. A note states: "Takes 30 seconds. This creates your Prospect Starter Kit login — you'll connect your Gmail separately on the next step." At the bottom, it says "Already have an account? [Sign in](#) · [Home](#)".

2 Create a Gmail app password

1. In your **Google Account** → **Security**, turn on **2-Step Verification** (required for app passwords).
2. Go to myaccount.google.com/apppasswords.
3. Create an app password named **"Prospect Starter Kit"**, then copy the 16-character code.
4. In **Gmail** → **Settings** → **Forwarding and POP/IMAP**, make sure **IMAP is enabled**.

An app password is a one-off code just for this tool — it's not your Google password, and you can revoke it anytime.

3

Connect your Gmail

1. On the **“Connect your Gmail”** page, enter your **Gmail address**.
2. Paste the **16-character app password** from Step 2.
3. Click **“Connect Gmail”**. You’ll see your connection link + token. (Stuck? There’s a 1-minute tutorial video right on this page.)

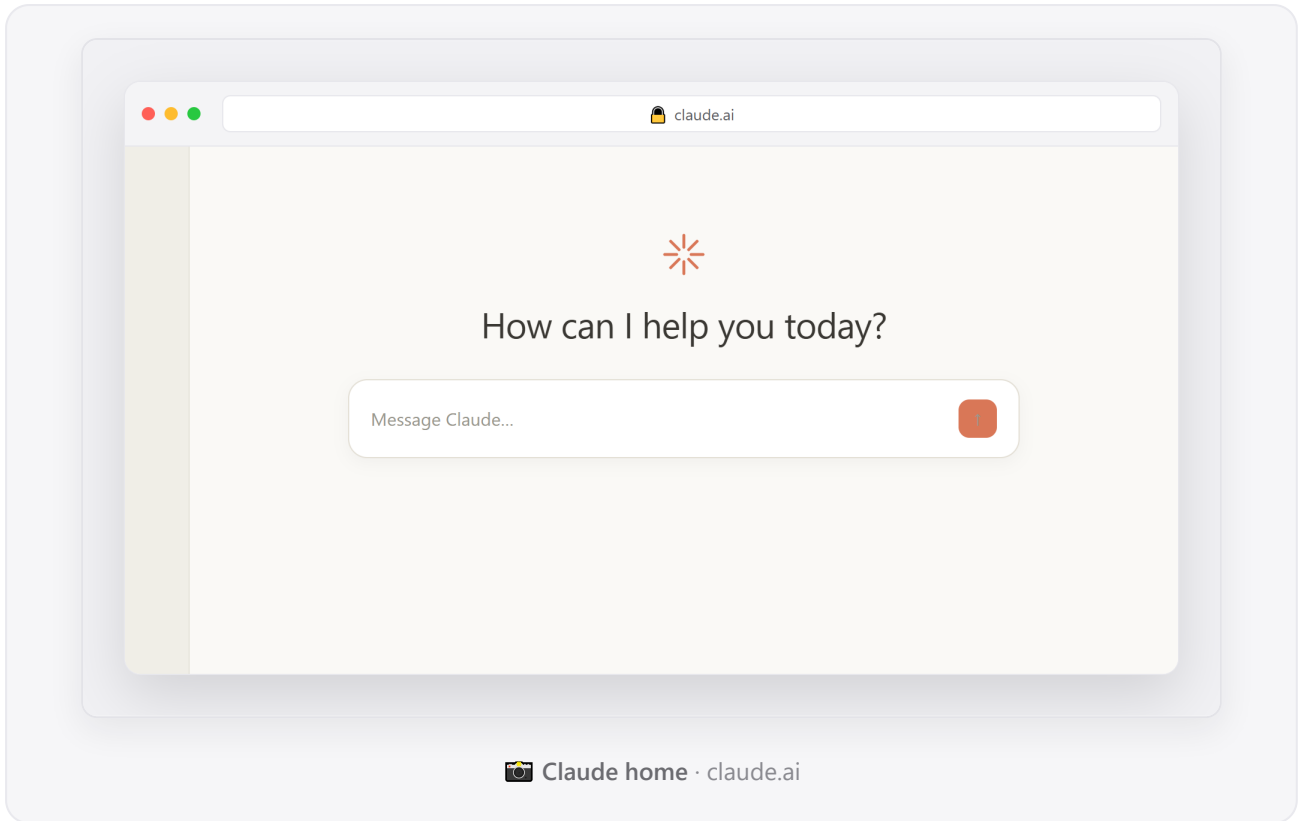

The screenshot shows a web form titled "Connect your Gmail" with a purple cube icon. It is labeled "STEP 2 OF 2 · CONNECT EMAIL". The form contains two input fields: "GMAIL ADDRESS *" with the placeholder "you@gmail.com" and "GMAIL APP PASSWORD *" with the placeholder "abcd efgh ijkl mnop". Below the password field is a small note: "16-char app password — needs 2-Step Verification on + IMAP enabled. Create one at [myaccount.google.com/apppasswords](\"http://myaccount.google.com/apppasswords\")". At the bottom is a black button labeled "Connect Gmail" and a link labeled "Home".

4 Open Claude

1. Go to claude.ai (or open the Claude desktop app) and sign in — or create a free account.

5 Add the custom connector

1. In Claude, open **Settings** → **Connectors**.
2. Click **“Add custom connector”**.
3. Paste your connection URL: `prospect-starter-kit.nineten.ai/mcp`.
4. **On the web:** sign in with your account email + password (from Step 1). **Desktop / Code:** paste the token shown after you connected in Step 3.

6

Start using it

Open a new Claude chat and just ask — for example:

- *"Research acme.com and draft a short intro email to their Head of Sales."*
- *"What's new in my inbox? Anything I should reply to?"*

Claude researches the prospect, drafts the email in your voice, and sends it from your own inbox — **you just approve.**
